Achieve Simplified Cash Handling

The SMARTtill[®] Cash Management Solution

The SMARTtill[®] Solution is a new revolution in cash management, enabling retailers to reduce cash losses, reduce the cost of cash handling, and improve in-store productivity. The SMARTtill[®] Solution is an innovative cash management system suitable wherever cash is transacted.

The SMARTtill[®] Intelligent Cash Drawer captures, in real-time, all cash activity at its location and reconciles to sales made. This information is collected without affecting transaction time or interrupting the retail transaction. The SMARTtill[®] Solution can be integrated with your POS hardware/POS application.

The data from the SMARTtill[®] Units can be populated into any suitable database and used to support intelligent cash management to enable real-time cash visibility at the POS. This can be via new or existing back office systems. Examples of the type of information for each SMARTtill[®] Unit, includes; current cash float value; change levels compared to an optimum level; change top up requirements; value of change added; various alerts for cash lifts; cash errors; and discrepancy data by transaction, shift, cashier, time and date.

Four Key Areas of Impact

Operations

- Eradicate manual cash till counts and reduce cash loss investigation time
- Redeploy labor for an improved shopping experience

Loss Prevention

- Full cash transaction audit trail
- Ability to integrate CCTV to pinpoint discrepancies
- Reduce cash losses by up to 90%

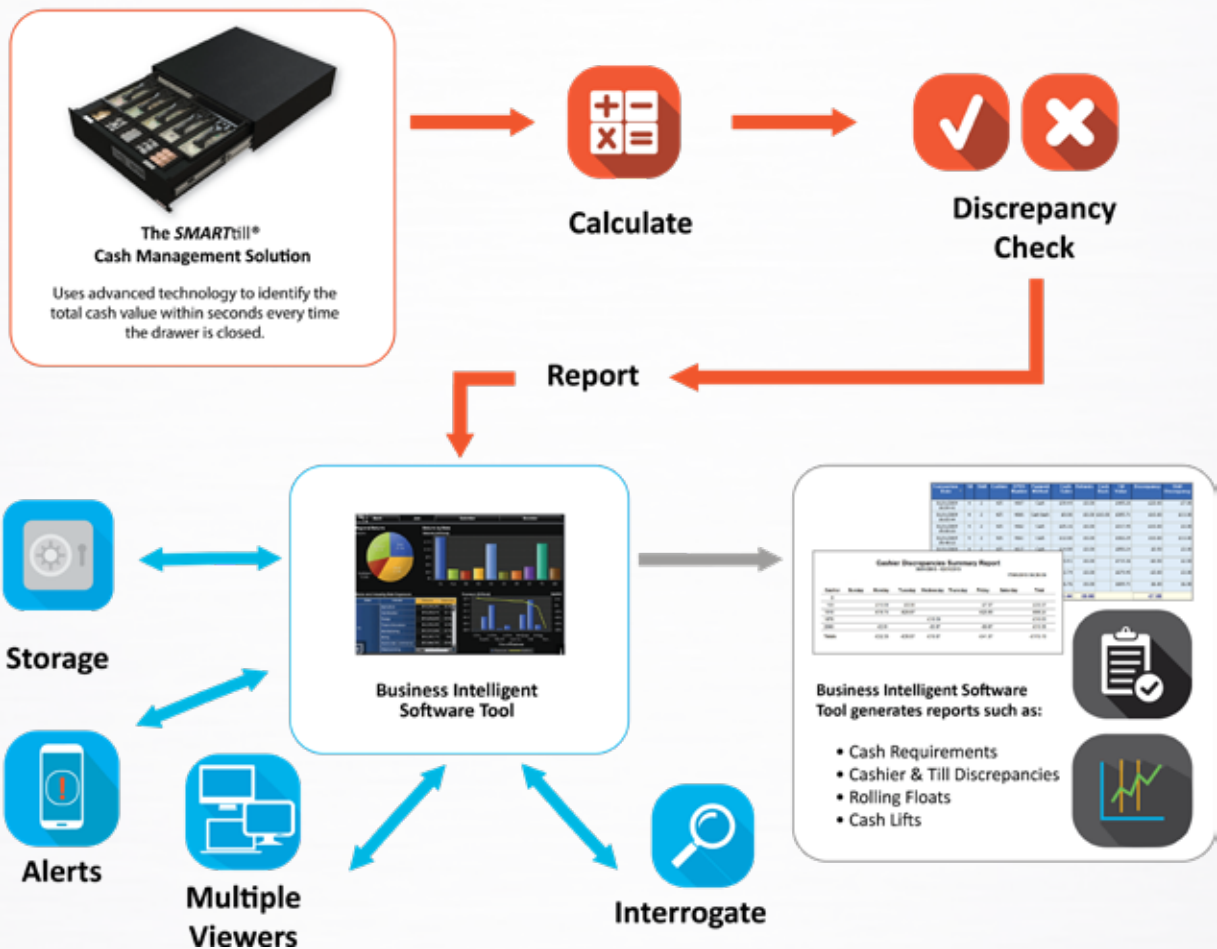

Data Analytics

- Security alerts on cash transaction errors, lifts, top ups, and CIT pick ups
- Predictive analytics; cashier, lane and store performance data

Treasury

- Reduce cash in transit (CIT) fees
- Reinvest your 'dead' cash
